

Sun Signs July - August 2010

with Kerry Galea

Aries

22 March – 20 April

Your expectations are changing; your world has expanded, staying where you are means staying small. Authorities may try to keep you down, but it's too late. There will be sparks and excitement in your relationship zone with both fun and annoyances promised.

Cancer

22 June – 23 July

A New Moon in your sign means you have the opportunity to begin afresh and start any idea or project. Home renovations may be needed, but money could be the problem. Any tension with family members has the potential to be resolved.

Libra

24 September – 23 October

A changing dynamic between you and another person means you know it cannot stay the same. With Mars and Venus coming together in your sign you have the energy and the magnetic X factor to make things happen as new goals become achievable.

Capricorn

23 December – 20 January

You are torn between making lots of compromises and taking a well deserved break. The decisions will eventually have to be made and it will be easier than expected, as others will look up to you to lead the way in taking necessary responsibilities and making the difficult decisions.

Taurus

21 April – 21 May

There is the opportunity for an event or celebration but if tensions arise then remember that being right does not mean winning. The Full Moon enters your work zone, and emotions there will be at an all time high. Pay attention to unexpected responsibilities.

Leo

24 July – 23 August

Good news will still come regarding more travel. You may be lucky with money or treasures. Then in August a New Moon in your sign suggests you are bursting with new life and potential for new ideas or new projects, and this includes fitness or diet changes.

Scorpio

24 October – 22 November

The New Moon brings in a restless mood so let yourself travel or move. Any ongoing health issue will need attention. Vivid dreams and unclear communications lead to confusion. Work will be a distraction but don't ignore it as new opportunities are on the offer.

Aquarius

21 January – 19 February

The month is focused on information that may be true, or may be false. Double check every single fact and all sources of advice, and don't believe in the gossip. Later on sort out arrangements with other people and money or possessions that you share.

Gemini

22 May – 21 June

The trend continues with the planet that loves to talk, Mercury, entering your zone of communication and you will not be able to stop chatting, discussing and even gossiping. Surging with creative power; you will get away with any outrageous stunt.

Virgo

24 August – 23 September

The goddess of love enters your sign and brings you the ability to magnetically attract whatever you desire; except money. Your zone of finances is really in the spotlight. Seek advice and finalize plans. Later in August allow yourself time to revise any decisions, and expect delays.

Sagittarius

23 November – 22 December

Every facet of your life is incredibly busy right now. Connecting, joining a group or an event will lead to fun. The New Moon brings in the urge for new sights. Play the waiting game with work as recent decisions will be changed.

Pisces

20 February – 21 March

There are opportunities for celebrations and new social activities and perhaps a new love. Money may be an issue. It's a good time to improve health through exercise or diet. The big focus is on letting go and cleaning out mental and physical rubbish.
